Identification & Seals Register

Vessel	
--------	--

FREQUENCY OF USE	<ol style="list-style-type: none">1. To be used to record the identification of critical equipment and the application or removal of tamper evident seals.
FILING & REPORTING	<ol style="list-style-type: none">1. To be held by the Chief Engineer.2. Upon completion of any section, a new register is to be attached to the back of this document and recording continued therein.
RESPONSIBILITY	<ol style="list-style-type: none">1. Chief Engineer responsible for ensuring register is kept up to date.2. Crew members who apply or remove seals responsible for ensuring those applications/ removals are recorded in this register

Contents

1. Introduction
2. Verification Requirements
3. Seals Register
 - A. Seals Applied to Oily Water Separator Discharge Piping Flanges
 - B. Seals Applied to Overboard Discharge Valves
 - C. Seals Applied to Bilge Cross-Connection Valves
 - D. Seals Applied to Bunker System Flanges
 - E. Seals Applied to Bunker Valves
 - F. Seals Applied to Blank Flanges
 - G. Seals Applied to Other Valves
 - H. Seals Applied to Other Flanges
 - X. Seals Applied for Other Environmental Protection Applications
 - Y. Seals Applied for Other Safety or Security Applications
4. Identification Register
 - A. Flexible Hoses
 - B. Portable Pumps
 - C. Other
5. Verifications
 - A. Chief Engineer's Quarterly Verifications
 - B. Master's Six-Monthly Verifications

1. INTRODUCTION

This register has been provided to the ship as a tool to enable the effective implementation of environmentally sound shipping practices and to allow for the recording of other seals applied for safety or any other purpose. It is referred to directly in MSMS section A10 Environmental Protection, which all crew are required to be familiar with.

It is to be held by the Chief Engineer, who is responsible for ensuring that it remains up to date at all times. The register is to be held onboard for the life of the ship, and presented to members of the Ship Management Team, Fleet Office, auditors or inspectors upon request.

Once any section of the register is full, an entirely new register is to be stapled/ glued/ attached to the back and that section continued there.

2. VERIFICATION

To ensure that the register is being correctly used the following random checks and inspections are to be carried out and recorded in the appropriate part of section 5:

i. Quarterly (by the end of March, June, September and December)

The Chief Engineer is to randomly select:

- One identification tag
- One seal

and is to personally verify that the physical tags/seals correspond with the information recorded in this register.

ii. Six-Monthly (by the end of June and December)

The Master is to randomly select:

- Two identification records/tags
- Three seals

And is to personally verify that the physical tags/seals correspond with the information recorded in this register.

iii. Inspections by Ship Management Team

Whenever a member of the Ship Management Team is onboard they should take steps to verify the accuracy of a sample of the information contained in this register.
